Applicants respectfully request reconsideration of the present application in view of the remarks below.

With regard to the objection to claims 33-35 and 40, Applicants assert that "retrofitable" is spelled correctly, thus no correction is required.

With regard to the multiple §103(a) rejections, Applicants assert that Linehan may not preclude patentability under §103. The present invention is subject to an assignment to International Business Machines Corporation as recorded on Reel 012696, Frame 0803 on March 15, 2002. Linehan is a divisional application of Application No. 10/891,241, which is also subject to an assignment to International Business Machines Corporation. Therefore, Applicants assert that because Linehan only qualifies as prior art under §102(e), and because Linehan was subject to an obligation of assignment to the same entity at the time the present invention was made, Linehan may not preclude patentability under §103. Accordingly, Applicants therefore respectfully request withdrawal of the §103(a) rejections of claims 1-49.

In view of the above, Applicants believe that claims 1-49 are in condition for allowance, and respectfully request withdrawal of the §103 rejections.

Respectfully submitted,
